

MIRROR INSTRUCTIONS

KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE

IMPORTANT do not strike the mirror with hard or pointed objects. Do not place the mirror near very hot or cold items unless an adequately thick insulation material is used to prevent such items from coming into contact with or affecting the glass.

Do not expose the mirror to excessive moisture or place too close to a heat source.

When cleaning the mirror, use a damp cloth or leather.

Do not use washing powder or any abrasive substance.

HANGING INSTRUCTIONS

IMPORTANT This mirror should be hung on a wall of suitable strength to hold its weight. If in doubt consult a qualified professional.

Depending on the size of the mirror, 1 2 or 3 D rings maybe fitted. Please ensure the mirror is hung on all these points and each screw is fixed to the wall correctly. All screws must be level.

Fit 50mm (size 8) "dome head" screws to the wall leaving about 10mm protruding from the wall. (use wall plugs where required)

These screws should be the same distance apart as the brackets on the back of mirror. We recommend using a spirit level to position the screws for best results.

Once the screws are in place the mirror can be hung accordingly.

Do not hang the mirror on string or chain. (see diagram)
