

- 3.b. If your mirror has 3/4 keyhole slots or hanging hooks it may be hung either vertically or horizontally. First choose which orientation you prefer and assess which slots will be used.
4. Measure the distance between the edges of the mirror and the chosen slots or hooks; mark on the wall the location of the highest part of the slot/hooks (as this is where the mirror will rest once fitted).
5. Double check the distance between the two slots and your marks on the wall, ensuring they are level. (a length of masking tape can be applied loosely to the back of the mirror covering the fixing holes and the edge of the mirror, you can then mark the edges of the mirror and the fixing holes on the masking tape. Gently remove the masking tape and apply this to the wall as a guide for marking).
6. Check for pipes and electrical installations in the area of fixings, if you are unsure consult a professional. Check you have the right wall fixings for your wall type. Using the correct sized drill bit carefully drill holes at the marking points a little deeper than the length of your wall fixings. Insert your wall fixings, ensure they are snug and fully inserted. Fix your screws leaving approximately 5mm of the head protruding.
7. Using two people carefully lift the mirror onto the fixings. It's easier if one fixing is located first then the second fixing can be found a little easier. It may assist to tilt the mirror away from the wall to enable you to look from the side to establish the location of the fixings.
8. Clean the area and finally clean the mirror using a soft dry cloth. See the care instructions for maintenance and cleaning.

HANGING INSTRUCTIONS & CARE GUIDE

please read and retain for future reference

HEAT AND SUNLIGHT

- It's best to avoid exposing your mirror to excessive heat for example by placing it directly above a radiator as this can cause cracking.
- A minimum of 30cm clearance from heat sources is advised.
- When siting your product, environment and humidity are important, so locations which are often damp or exposed to excessively high or low temperatures should be avoided.
- Unless otherwise stated on the product or its packaging, our mirrors are not suitable for use in bathrooms.
- It's important to be aware of reflected sunlight from mirrors which may cause scorching if left exposed for long periods.

MAINTENANCE & CARE INSTRUCTIONS

To prolong the life of your mirror we advise the following:

CLEANING

- To maintain the appearance of your mirror we recommend regular dusting with a soft cloth.
- Glass or mirrored panels should be cleaned using a non-solvent based glass cleaner and soft cloth, carefully avoiding contact with wooden or painted sections.
- Substances which contain abrasives (eg. washing powders) should be avoided as these may scratch the glass.

CARE

- Take care to avoid chemicals such as iodine, hair products, shaving creams and lotions, alcohol, perfume, acetone, cosmetics and paint remover coming into contact with your mirror as these may damage the mirror's finish.
- Always follow the hanging guidelines carefully to prevent unnecessary damage or accidents.
- It's best to avoid using delicate protrusions as hand

holds when carrying mirrors and always use two persons to lift, as dragging or carrying single handed may cause the frame to twist or damage the joints which may crack the glass.

- Dropping mirrors will cause damage.
- On dressing table mirrors ensure the sides are positioned carefully to keep the mirror stable.
- Your mirror will last longer if you prevent sharp objects from coming into contact with the surface or dragging items across the surface as this may cause fine scratches or damage in the glass.
- If your mirror becomes stained, scratched or chipped, we recommend professional help is sought to restore it. If you have relevant insurance you may wish to contact them for advice.

Following these guidelines will ensure products are used and installed correctly and that performance is maintained so you can enjoy your mirror for longer.

LAURA ASHLEY MIRRORS

Laura Ashley mirrors are craftsman made with great care and attention to produce distinctive pieces that will bring pleasure for years to come.

- Each mirror is hand finished.
- Selected mirrors have hand cut decoration.
- With careful use these finely produced pieces will give many years of satisfaction

SPECIAL FINISHES

- It's worth taking a little time to understand any special finishes or distressing which may be a feature of your mirror.
- Gold effect leaf is hand applied and will give a random, and in places uneven surface which creates interesting features.
- Some mirrors may show intentional feature distressing or random crackling in the frame finish and colour may vary for a truly individual look.

HANGING INSTRUCTIONS

- Please follow the hanging guidelines carefully.
- It's important to use the correct sized secure wall fixings. We recommend professional assistance is sought.
- Do not hang your mirror on damp or recently plastered walls.
- Floor standing mirrors have wall safety chains supplied to prevent the mirror falling forward. These must be used at all times. These chains must never be used to hang the mirror on a vertical surface.

CARE: This mirror is heavy and requires secure wall fixings. We recommend professional assistance is used to hang it. Two people are required to lift the mirror into position.

Tools required: Suitable fixings for your wall. Suitable drill bit for the fixings and electric drill. Screwdriver. Cloths and vacuum cleaner for cleaning.

Check the care instructions to ensure the mounting location is suitable.

1. Ensure you have enough space to unpack your mirror and a suitable place to lay the mirror on it's back (you can place the mirror on the packaging but be aware that the mirror box may have had a long journey to you and may not always be 100% clean on the outside so lay a dust sheet below, to protect any carpets or furniture)
2. Your mirror may be fitted with hanging hooks or 4 way keyhole slots. The process for hanging with both of these remains the same.
3. a. If your mirror only has two keyhole slots or hanging hooks then it is designed to only be hung in a single orientation, do not attempt to modify your mirror to hang any other way.
